PROFESSIONAL SUMMARY

Frontend Developer with 2 years of professional experience building production fintech, education technology and AI web applications with React, Next.js, TypeScript and JavaScript. Author of more than 1,100 commits across 14 production codebases. Experienced in loan application and identity verification (KYC) flows, payment and invoicing dashboards, AI chat interfaces, marketing websites and API documentation. Works with distributed teams across time zones. First Class Honors graduate in Mechanical Engineering.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks and Libraries: React, Next.js (App Router), Vite, Tailwind CSS, Ant Design, Chakra UI, Radix UI, Framer Motion, Three.js (React Three Fiber), Recharts

State Management and Data: Redux Toolkit, Zustand, TanStack Query (React Query), Axios, REST API integration, React Hook Form, Formik, Zod, Yup

Authentication and Payments: Google OAuth, OTP email verification, Paystack, Flutterwave, Mono Connect (bank account linking and direct debit), Smile Identity (KYC)

Server-Side: Next.js API routes (serverless functions), transactional email with Resend

Tools and Practices: Git, GitHub, Azure DevOps Pipelines, Vercel, Figma, Responsive Web Design, Agile and Scrum, Technical Documentation

PROFESSIONAL EXPERIENCE

Frontend Developer Associate

Edubanc (Cone Venture Studio) | Lagos, Nigeria | Aug 2025 - Present

Edubanc is a Nigerian fintech company that finances school fees, graduate programs and professional exams. Frontend developer across eight of its web products.

Edubanc Financing Platform (React, TypeScript, Redux Toolkit, TanStack Query, Chakra UI)

- Built parent loan application flows: multi-student loan requests, save-and-resume loan drafts, a review and submit step with interest calculation, terms acceptance, and graduate and professional exam financing.
- Implemented identity and credit steps: Bank Verification Number (BVN) checks with one-time passwords, National Identification Number (NIN) capture, document upload, credit checks and direct debit mandate setup.
- Built admin dashboard features for the operations team: loan application and loan request review tables, manual school loan review, partner management and partner performance pages, repayment schedules, payment recording and payment rescheduling.
- Built school dashboard features including manual student upload, school sign-up and password recovery, and back-office monitoring pages for bank-linking webhooks, system errors and request traces.
- Resolved production build failures and mobile rendering defects; integrated the repayment API.

Edubanc Marketing Website (Next.js, TypeScript, Tailwind CSS, Framer Motion, React Hook Form, Zod)

- Second-largest contributor with about 350 commits over 12 months.
- Built and maintained product pages for school fee financing (families, schools and teachers), exam financing (PMP and CFA), graduate financing, tuition invoicing and exam practice, plus the About page and a partner university page.
- Built loan and installment calculators and validated financing application forms connected to backend APIs.
- Built the site navigation with a products dropdown and footer, added animations, and made every page mobile responsive.

EdPay Orbit Tuition Invoicing, Admin and School Applications (React, TypeScript, Vite, Ant Design, Zustand)

- Built the admin dashboard, school onboarding and school detail editing, bank details, transactions and settlement transfer views.
- Built academic session and term setup, bill items, invoice creation, wallet pages and an inputter and authorizer (maker-checker) approval workflow.
- Built audit logs, reports and analytics, account activation controls and invoice resend to parents.

School Portal and API Suite (React, TypeScript, Redux Toolkit, TanStack Table)

- Built invoicing end to end: invoice tables, invoice details, single and bulk invoice creation, classes, terms and optional fees.
- Built CSV bulk upload for students, parents, classes and terms, plus wallet creation, API key listing and deletion, and compliance certificate upload.

Other Edubanc and Sister Products

- **Edubanc Learn (exam practice):** built study and home page features, exam types, subject and topic mapping, feedback forms and an exam financing prompt shown after a practice exam.

- **Partner API Documentation (Next.js, Nextra):** co-authored developer documentation for loan flows, identity verification and signed webhooks (HMAC-SHA256), including plain-language guides for integrators.
- **Plearnty (student quiz platform):** built a new sign-up flow, BVN verification retry in the wallet, and referral pages.
- **Verticul (online course marketplace):** built course bundles on the learner and admin applications with validation, discount controls and payment flow updates.

Frontend Developer

Prodigal AI | Remote | Oct 2024 - Feb 2026

Voyex AI Search and Discovery Platform (Next.js, Redux Toolkit, Tailwind CSS, Radix UI, Google Generative AI)

- Primary frontend contributor with more than 300 commits, about three quarters of the codebase history.
- Built the AI chat and search interface: message rendering, chat input, history, product recommendation cards, and sharing, renaming and deleting conversations.
- Built authentication and onboarding for individual users and organizations: sign-up, Google sign-in, email OTP verification, password reset and profile upload.
- Built the product marketplace: listings, dynamic product detail pages, reviews with half-star ratings and user feedback.
- Built the workspace, templates, analytics and settings pages (security and personalization) from Figma designs.

Voyex Landing Page (Next.js, Framer Motion, Three.js)

- Built and maintained the marketing site with about 200 commits: animated hero, templates showcase, FAQ, contact form and full mobile responsiveness.

Linkup Startup and Investor Platform (Next.js, TypeScript)

- Built dashboard pages for founder, broker and investor roles, integrated newsfeed endpoints (post, vote, share, comment) and applied a dark theme.

INDEPENDENT PROJECTS

- **Bildare (2025 - 2026):** marketplace for Figma UI kits and design systems. Built the application and landing page with Next.js, TypeScript and Tailwind CSS, including waitlist, feedback and builder application forms that send transactional email through serverless API routes.
- **LeaseGuard (2026):** tool that analyzes a lease from an uploaded PDF or pasted text. Built with Next.js and TypeScript, with PDF parsing, login and registration, and API routes.
- **Tranzyte (2026):** website for a transport and logistics training school, built with React and Next.js.

ENGINEERING INTERNSHIPS

Automotive Service Engineer Intern

R.T. Briscoe Nigeria PLC (Ford Motors Division) | Lagos, Nigeria | Oct 2023 - Feb 2024

- Diagnosed, maintained and repaired Ford vehicles to manufacturer standards as part of a service team.

Intern Engineer

Aquacy Waters | Lagos, Nigeria | May 2022 - Jun 2022

- Inspected and maintained plant machinery and helped troubleshoot mechanical faults to keep production running.

EDUCATION

Bachelor of Engineering (B.Eng), Mechanical Engineering

Federal University of Technology, Akure (FUTA) | Akure, Nigeria | Graduated Nov 2024

CGPA: 4.52 / 5.00, First Class Honors (the highest degree classification in the Nigerian university system)

Final Year Project: Design and Fabrication of an Automated Pantograph. Integrated servo motor actuation and joystick control to automate precision scaled drawings. Applied control systems principles, instrumentation and performance data logging to quantify improvements in speed, repeatability and output consistency over manual operation.

AWARDS

PTDF ISS Merit Scholarship Award, Petroleum Technology Development Fund (Federal Government of Nigeria). Competitive merit-based federal scholarship awarded to high-performing Nigerian engineering students.

LEADERSHIP EXPERIENCE

Team Leader, Customer Experience

AIESEC in Akure | Akure, Nigeria | Feb 2023 - Sep 2024

- Led two teams in succession (Outgoing Global Talent, then Outgoing Global Volunteer) supporting international interns and volunteers through application, pre-departure preparation and on-assignment support; collected feedback and improved the support process.
